

List of eligible expenditures for Measure – Investments in physical assets on agricultural holdings		
<i>No.</i>	<i>Eligible expenditure</i>	<i>Description</i>
1	<p>Purchase of new agriculture equipment and mechanization for crop sector</p> <ul style="list-style-type: none"> - tractors with a maximum power not exceeding 100 KW based on scale and nature of activity (see Annex 1 to the LEE), cultivators, moto cultivators and attachments; - machinery and equipment for land preparation, - planting, - purchase of perennials - irrigation and crop cultivation, - harvesters (excluding combine harvesters) - control and protection equipment 	<p>Tractor, motocultivator, power tiller, plough, rotary tiller, rotary harrow, disk harrow, grain drill, broadcast seeder, seed/fertilizer drill, cultivator, planters, levelers, diggers, land plane, transplanter. Manure spreader, fertilizer broadcaster, sprayer, duster, irrigation devices for drip irrigation, sub-irrigation, micro-sprayers and mist irrigation (water pumps, basins, water tanks/reservoirs, filters, equipment for water distribution network, equipment for ferti-irrigation unit, equipment for automatic dosage of water for irrigation), pruning machine, weeders. Mower for grass crops, hay rake, hay baler, forage harvester, forage blower, corn picker, digger, potato harvester, carrot harvester, tomato harvester, sugar beet harvester, grape harvester, fruit harvester, reaper-binder, thresher, grain cleaner, sorters and graders. Equipment for indoor and outdoor measurement of temperature, soil moisture and air humidity, soil sterilisation and soil testing equipment. Protection nets and covers, bird's protection, lightning protection and frost protection equipment. Equipment for hailstorm protection, equipment for propagating, storage and manipulation of planting material. Equipment and machinery for soil-less cultivation (hydroponic and aquaponics). Equipment for preparation and mixing of fertilisers, substrates, plant protection products, etc.</p>
2	<p>Planting/re-planting of perennials (excluding seeds)</p>	<p>Planting material must be of fruit variety in accordance to the List of the approved and recognized fruit varieties and/or List of domestic and foreign vine of table grape varieties and in compliance with Annex I of Council Directive 2008/90/EC or in accordance with the National Variety List according to Law on seed and propagating material and Law on wine or EU</p>

List of eligible expenditures - LEE for Measure: Investments in physical assets of agricultural holdings - final draft (v. 17092018) as accepted by the Commission on 20.12.2018 -

		<p>Common catalogue of varieties of vine and of varieties of vine-rootstocks.</p> <p>In case of replanting the same variety on the same agricultural plot/parcel, the purchase of seedlings must be linked with investments that are leading to modernization (purchase of agricultural mechanization and equipment and or/water saving practices).</p>
3	<p>Purchase of machinery and equipment for livestock sector</p> <ul style="list-style-type: none"> - tractors with a maximum power not exceeding 100 KW based on scale and nature of activity (see Annex 1 to the LEE), cultivators, moto cultivators and attachments, - machinery and equipment for land preparation, - planting, - irrigation and crop cultivation, - harvester (excluding combine harvesters), - control and protection equipment, - equipment for animal breeding. 	<p>Tractor, moto cultivator, power tiller, plough, rotary tiller, rotary harrow, disk harrow, grain drill, broadcast seeder, seed/fertilizer drill, cultivator, planters, levelers, diggers, land plane, transplanter, manure spreader, fertilizer broadcaster, sprayer, duster, irrigation devices for drip irrigation, sub-irrigation, micro-sprayers and mist irrigation (water pumps, basins, water tanks/reservoirs, filters), equipment for water distribution network, equipment for ferti-irrigation unit, equipment for automatic dosage of water for irrigation) mower for grass crops, hay rake, hay baler, forage harvester, forage blower, corn picker, digger, reaper-binder, thresher, grain cleaner, sorters and graders. Equipment for outdoor measurement of temperature, soil moisture and air humidity, soil sterilisation and soil testing equipment. Equipment for animal breeding areas (reproduction, quarantine, disease prevention and removal of the carcasses). Equipment for feeding and watering installations, equipment for milking and milking installations, automatic or mobile milking aggregates, equipment for handling and storage of manure including machinery for manure clearing and handling, grain and silage elevators, equipment for production of compound feed (mills, mixture for food, mixers etc.), equipment for weighting), equipment for internal veterinary checks and veterinary kits.</p>
Eligible expenditure related to all priority sectors		
	<i>Eligible expenditure</i>	<i>Description</i>
4	Building materials and elements for construction of	All materials used for construction of floors, walls and ceilings surfaces as well as any coatings and

	<p>new facilities or reconstruction and improvement of existing facilities (buildings and infrastructure to a full functional capacity) as well as greenhouses/glasshouses.</p> <ul style="list-style-type: none"> - for installation/housing of the eligible equipment; - to achieve environmental standards; - for provision of hygienic and sanitary requirements; - to achieve animal welfare standards; - to assure administrative space; - feed and fodder production and storage; - auxiliary buildings (storage, garage, etc.); - access, farm infrastructure, landscaping and fencing 	<p>joint sealants that are used in facilities where foods are prepared or stored as well as for the administrative space, laboratory and sanitary arrangements and infrastructure related to the production activity. Coatings for wall, ceiling, floor, wall and ceiling panels, pipe covers, doors, windows, heating and ventilation system (air-conditioning and air-purification), drainage, sewage system, waste treatment and waste valorisation system. Construction elements for water and electric power generation and supply, including energy saving practices and use of renewable energies and installation of electricity supply, water supply and sewage systems, pump stations, artesian boreholes and wells. Posts and end-posts pillars made of wood, steel, concrete or other material, anchors for grounding the installation and tensioners, galvanized steel wire, supporting frames made of metal, plastic coverings. Construction material for greenhouses (plastic film or panels must be made of rigid plastic with durability of minimum 5 years).</p> <p>Construction material/components for provision of internal access roads and road network within establishment, landscaping and fencing of the area surrounding the establishment.</p>
5	<p>Purchase of equipment for post-harvesting activities, on-farm processing and direct marketing of:</p> <ul style="list-style-type: none"> - Fruits and vegetables including potatoes, mushrooms and leguminous crops; - Cereal, miller's and starch products; - Vegetable and animal oils and fats; - Grape must, grape juice, wine and vinegar; - Meat and meat products; - Milk and dairy products 	<p>Reception, collection and storing equipment. Equipment for preparatory treatment for sorting, curing, cleaning, washing, drying, disinfection, waxing, sorting, grading, culling of damaged crops, metal and glass detecting or other solid materials. Equipment for pre-cooling, cooling and refrigerating. Equipment for cutting, milling and other pre-processing preparation equipment. Equipment for de-aeration, separation, homogenization, pasteurization and sterilization. Equipment for canning, drying, desiccation, freezing. Equipment for bottling, packing and labeling. Stunning, dripping, scalding and evisceration equipment, equipment for cutting and de-boning. Equipment for manipulation, loading and un-loading, forklifts, conveyor belt systems,</p>

		weighting equipment. Equipment for quality monitoring, control and traceability systems of reception, storage and distribution. Waste treatment, valorisation, handling and storage equipment. CIP equipment (CIP-clean in place). Processing equipment, grape crushers, equipment for filtration (filters), pumps, fermentation tanks, stabilization tanks, equipment for distillation, press for grape must, ageing and storage tanks, barrels.
6	Purchase of equipment for production of energy from renewable resources for self-consumption	<ul style="list-style-type: none"> - Equipment for production of energy through: - processing of plant products for production of biogas and/or biofuels, - solar energy, - windmills, - geo-thermal energy etc.
7	Works and services	<p>All necessary works and services related to realization of project's investment:</p> <ul style="list-style-type: none"> - Preparation of terrain - Construction works - Reconstruction works - Installment activities
8	Purchase of specialized transport tanks and trailers for raw material and outputs	Agriculture trailers, bulk milk tankers, cooling trailers, trailers for transporting live animals and poultry, manure transportation, transportation equipment for biomass, etc (only related to eligible production activity).
9	Computer equipment	Computer equipment and software including sensors (only related to eligible equipment and to production activity).
10	General costs	<p>Preparation of the technical documentation, construction plans, cost calculations, analysis, project management</p> <ul style="list-style-type: none"> - architects - engineers - consultants <p>Acquisition of patent rights and licenses</p> <p>Management systems:</p> <ul style="list-style-type: none"> - ISO - HACCP - GMP (Good Manufacturing Practices)
